DESCRIPTION AND PURPOSE OF ITEM

This item indicates the width of that portion of a divided highway separating opposing directions of traffic. This width is measured from inside edge of pavement to inside edge of pavement.

This information is used in map preparation and for safety and capacity analysis.

This item can be obtained from construction plans or, if plans are unavailable, field measurement. If in question, contact the district Bureau of Program Development.

CODE AND SCREEN ENTRY INSTRUCTIONS

A 3-digit number, right justified.

Enter the appropriate measurement filling leading space with zero.

Round dimension measurements down to the nearest foot.

Within median transitions, code the average width of the transition until the full width of the median is reached.

Example

Median Description

062

50 ft wide grass median with 6 ft inside shoulders and median ditch.

022

22 ft wide curbed median with spaced median cross-overs.
